

KENE VEN

705-772-7675 | kenevenanyanwuocha@trentu.ca | Peterborough, ON | linkedin.com/in/keneven | github.com/keneven | keneven.github.io

HIGHLIGHTS OF QUALIFICATIONS

- Fourth-year Computer Science student specialising in Data Analytics, graduating April 2027 with an **84.5%** average (3.7 GPA), Dean's Honour Roll, and the Champlain College Certificate of Excellence three years running.
- Built and published an AI agent that verifies its own output: every figure checked against computed data before release, at **98%** error detection, **0** false positives, enforced in CI.
- Two summers interning at a Toronto consulting firm, in business analysis and IT support, plus two data externships: requirements gathering, process mapping, production SQL, schema design, and reporting for non-technical stakeholders.
- Co-founded and shipped a live web and Android product to **477** signups and **100+** Google Play downloads, owning the product and onboarding flow end to end.

EDUCATION

Trent University, Peterborough, ON

Sept 2023 – Apr 2027 (expected)

Honours Bachelor of Science, Computer Science, specialising in Data Analytics | Cumulative Average: 84.5% (3.7 / 4.0)

- Champlain College Certificate of Excellence (2023, 2024, 2025) · Dean's Honour Roll (2023/24, 2025/26) · Trent International In-Course Scholarship

TECHNICAL SKILLS

Languages: Python, SQL, C, JavaScript

Data & Analytics: pandas, NumPy, scikit-learn, SciPy, Matplotlib, Plotly, Power BI (DAX, Power Query), Tableau, Excel

Databases & Tools: MySQL, SQLite, schema design & normalization, Git/GitHub, GitHub Actions, Jupyter, Linux, GA4

AI & LLM: Anthropic API, prompt design, LLM output verification and guardrails, automated evaluation harnesses, Lovable

Certifications: Google Data Analytics Professional Certificate (in progress) · **Campus & Community:** Trent Walkhome (Dispatch), Habitat for Humanity (Volunteer), 2023 – Present

EXPERIENCE

Breaking Games (via Extern)

Sept – Nov 2026

SQL & Database Architecture Extern (Remote)

- 8-week data engineering externship (Data Science / Data Engineering track) with a board game publisher; designing normalized relational schemas and documenting entity relationships and data dictionaries.
- Writing production-grade SQL (joins, window functions, CTEs, views) to build analytics-ready data models, and auditing existing data for integrity issues to propose database architecture improvements.

Topron Consulting · Toronto, ON (Hybrid)

2025 – 2026

Business Analyst Intern

Apr – Aug 2026

- Interviewed **12** stakeholders and reviewed existing documentation to reconstruct how the client's processes actually ran, translating findings into user stories and functional specifications for delivery teams.
- Mapped **5** business processes end to end, producing as-is and to-be documentation that pinpointed where manual steps could be automated or removed; several recommendations were adopted.
- Built the supporting analysis in Excel and SQL over datasets in the thousands of rows, and maintained status reporting and meeting documentation for the engagement.

IT Support Intern

Apr – Aug 2025

- Resolved end-user hardware, software, and account issues through the company ticketing system, escalating complex cases and documenting resolutions.
- Supported workstation setup, configuration, and user onboarding, and maintained internal support documentation for recurring issues.

Breaking Games (via Extern)

Feb – May 2026

E-Commerce Data Analysis & Strategy Extern (Remote) · Completer credential awarded May 2026

- Cleaned and validated e-commerce sales datasets in Excel and Python (pandas) to make them reporting ready and cut manual errors.
- Analyzed GA4, Google Ads, and Meta Ads data to surface pricing gaps, demand trends, and channel performance; flagged a 97% bounce rate on paid social traffic and proposed page-level fixes.

Blitz Speed Dating

Jan 2026 – Present

Co-Founder & Co-Creator | blitz-speed-dating.com

- Co-built and launched a live web and Android app for one-on-one video speed dating; grew it to **477** web signups and **100+** Google Play downloads, owning product, the real-time matchmaking flow, and user onboarding end to end.

DATA ANALYTICS PROJECTS · MORE AT KENEVEN.GITHUB.IO

Retail Gross Margin Review Agent

Python, LLM · Live demo + repo

- Built an agent that runs a monthly gross margin close end to end: validates and quarantines bad rows, ties control totals to source, decomposes the movement into price, volume and mix, detects anomalies, writes the commentary, and verifies every figure in it against the computed data before publishing.
- Deterministic code does the arithmetic and the model only writes prose, making verification a matching problem; measured by error injection at **98%** detection across **41** planted errors with **0** false positives, enforced in CI.

Sales & Revenue Executive Dashboard

Power BI, DAX, Power Query

- Modelled the source into a star schema and built an executive dashboard over **60,000** sales rows with time intelligence, targets vs actuals, and drill-down by product and region (**\$73.3M** revenue, **36.2%** margin, **+12.9%** YoY).

Customer Churn Analysis & Prediction

Python, scikit-learn

- Isolated month-to-month contracts as the churn driver across **7,500** customers (**51.8%** vs **7.9%**), and built a logistic-regression model at **0.798 ROC-AUC** recalling **75%** of churners.
