EDUCATION

Trent University, Peterborough, ON Sept 2023 – Apr 2027 (expected)
Honours Bachelor of Science, Computer Science, specialising in Data Analytics | Cumulative Average: 84.5% (3.7 / 4.0)
▪ **Achievements:** Champlain College Certificate of Excellence (2023, 2024, 2025) · Dean's Honour Roll (2023/24, 2025/26) · Trent International In-Course Scholarship · Global Citizen Award (2023)
▪ **Coursework:** Database Management Systems, Data Mining, Software Specifications & Development, Systems Programming in C, Applied Calculus, Linear Algebra. **In progress:** Data Visualization, High Performance Computing, Big Data.

TECHNICAL SKILLS

Languages: Python, SQL, C, JavaScript
Data & Analytics: pandas, NumPy, scikit-learn, SciPy, Matplotlib, Plotly, Power BI (DAX, Power Query), Tableau, Excel
Data Engineering: dbt, SQL data modelling, schema design & normalization, data transformation, data quality validation, ETL pipelines
Databases, Cloud & Tools: MySQL, SQLite, Git/GitHub, GitHub Actions (CI), Jupyter, Linux, GCC, GDB, AWS, Vercel, Firebase, GA4
Methods: Data cleaning, exploratory analysis, A/B testing, cohort analysis, churn modelling, dashboarding, KPI reporting

WORK EXPERIENCE

Breaking Games (via Extern) · Remote Sept – Nov 2026
SQL & Database Architecture Extern
▪ 8-week data engineering externship with a board game publisher: designing normalized relational schemas and documenting entity relationships and data dictionaries for analytics-ready use.
▪ Writing production-grade SQL and dbt models using joins, window functions, CTEs and views to build analytics-ready data structures, while auditing existing data for integrity issues and proposing database architecture improvements.

Topron Consulting · Toronto, ON (Hybrid) 2025 – 2026
Business Analyst Intern Apr – Aug 2026
▪ Interviewed **12** stakeholders and reviewed existing documentation to reconstruct how the client's processes actually ran, translating findings into user stories and functional specifications for delivery teams.
▪ Mapped **5** business processes end to end, producing as-is and to-be documentation that pinpointed where manual steps could be automated or removed, and explained the gaps to non-technical client stakeholders; several recommendations were adopted.
▪ Built the supporting analysis and KPI reporting in Excel and SQL over datasets in the thousands of rows, and maintained status reporting and meeting documentation for the engagement.

IT Support Intern Apr – Aug 2025
▪ Resolved end-user hardware, software and account issues through the company ticketing system, escalating complex cases and documenting resolutions.
▪ Supported workstation setup, configuration and user onboarding, and maintained internal support documentation for recurring issues.

Breaking Games (via Extern) · Remote Feb – May 2026
E-Commerce Data Analysis & Strategy Extern · Completer credential awarded May 2026
▪ Cleaned and validated e-commerce sales datasets in Excel and Python (pandas) to make them reporting ready and cut manual errors.
▪ Analyzed GA4, Google Ads and Meta Ads data to surface pricing gaps, demand trends and channel performance; flagged a **97%** bounce rate on paid social traffic and proposed page-level fixes.

Blitz Speed Dating · blitz-speed-dating.com Jan 2026 – Present
Co-Founder & Co-Creator
▪ Co-built and launched a live web and Android app for one-on-one video speed dating, deployed on Vercel and Firebase; grew it to **477** web signups and **100+** Google Play downloads, owning product, the real-time matchmaking flow and user onboarding end to end.

DATA ANALYTICS PROJECTS · MORE AT KENEVEN.GITHUB.IO

Retail Gross Margin Review Agent Python, LLM · Live demo + repo
▪ Built a Python agent that runs a monthly gross margin close end to end: validates and quarantines bad rows, ties control totals to source, decomposes the movement into price, volume and mix, detects anomalies, writes the commentary, and verifies every figure in it against the computed data before publishing.
▪ Deterministic code does the arithmetic and the model only writes prose, making verification a matching problem; measured by error injection at **98%** detection across **41** planted errors with **0** false positives, enforced in CI.

Global Superstore Profitability Tableau · Live on Tableau Public
▪ Published an interactive dashboard over **20,000+** orders across **21** countries, including a world profit map that surfaced **10** loss-making markets and identified Tables as the biggest profit drain.

Sales & Revenue Executive Dashboard Power BI, DAX, Power Query
▪ Modelled the source into a star schema and built an executive dashboard over **60,000** sales rows with time intelligence, targets vs actuals, and product, region and rep drill-down (**\$73.3M** revenue, **36.2%** margin, **+12.9%** YoY).

Customer Churn Analysis & Prediction Python, scikit-learn
▪ Isolated month-to-month contracts as the churn driver across **7,500** customers (**51.8%** vs **7.9%**); logistic-regression model at **0.80 ROC-AUC**; threshold chosen by expected cost rather than the 0.5 default, recalling **78%** of churners.

SQL Analytics Portfolio SQL (SQLite)
▪ Wrote **7** analytical queries against a **70,000+** row retail database using joins, window functions, CTEs and cohort logic; found Electronics drives **45.4%** of revenue.

CERTIFICATIONS & COMMUNITY

Certifications: Google Data Analytics Professional Certificate (in progress) · Extern Completer, Breaking Games Externship (2026)
Campus & Community: Trent Walkhome (Dispatch), Habitat for Humanity (Volunteer), 2023 – Present
