EDUCATION

Trent University, Peterborough, ON

Sept 2023 – Apr 2027 (expected)

Honours Bachelor of Science, Computer Science, specialising in Data Analytics | Cumulative Average: 84.5% (3.7 / 4.0)

- Dean's Honour Roll (2023/24, 2025/26) · Trent International In-Course Scholarship · Global Citizen Award (2023) · Coursework: Database Management Systems, Data Mining, Software Specifications & Development, Applied Calculus, Linear Algebra

TECHNICAL SKILLS

Languages: Python, SQL, C, JavaScript

Data & Analytics: pandas, NumPy, scikit-learn, SciPy, Matplotlib, Plotly, Power BI (DAX, Power Query), Tableau, Excel

Databases & Tools: MySQL, SQLite, schema design & normalization, Git/GitHub, Jupyter, Linux, GCC, GDB, GA4

Methods: Data cleaning, exploratory analysis, A/B testing, cohort analysis, churn modelling, dashboarding, KPI reporting

EXPERIENCE

Breaking Games (via Extern)

Sept – Nov 2026

SQL & Database Architecture Extern (Remote)

- 8-week data engineering externship (Data Science / Data Engineering track) with a board game publisher; designing normalized relational schemas and documenting entity relationships and data dictionaries.
- Writing production-grade SQL (joins, window functions, CTEs, views) to build analytics-ready data models, and auditing existing data for integrity issues to propose database architecture improvements.

Topron Consulting · Toronto, ON (Hybrid)

2025 – 2026

Business Analyst Intern

Apr – Aug 2026

- Gathered and documented business requirements from stakeholders, translating them into user stories and functional specifications for delivery teams.
- Mapped existing business processes and produced as-is and to-be workflow documentation to support process improvement recommendations.
- Built supporting analysis and reporting in Excel and SQL, and maintained status reporting and meeting documentation for project stakeholders.

IT Support Intern

Apr – Aug 2025

- Resolved end-user hardware, software, and account issues through the company ticketing system, escalating complex cases and documenting resolutions.
- Supported workstation setup, configuration, and user onboarding, and maintained internal support documentation for recurring issues.

Breaking Games (via Extern)

Feb – May 2026

E-Commerce Data Analysis & Strategy Extern (Remote) · Completer credential awarded May 2026

- Cleaned and validated e-commerce sales datasets in Excel and Python (pandas) to make them reporting ready and cut manual errors.
- Analyzed GA4, Google Ads, and Meta Ads data to surface pricing gaps, demand trends, and channel performance; flagged a 97% bounce rate on paid social traffic and proposed page-level fixes.

Blitz Speed Dating

Jan 2026 – Present

Co-Founder & Co-Creator | blitz-speed-dating.com

- Co-built and launched a live web and Android app for one-on-one video speed dating; grew it to **477** web signups and **100+** Google Play downloads, owning product, the real-time matchmaking flow, and user onboarding end to end.

DATA ANALYTICS PROJECTS

Retail Gross Margin Review Agent

Python, LLM · Live demo + repo

- Built an agent that runs a monthly gross margin close end to end: validates and quarantines bad rows, ties control totals to source, decomposes the movement into price, volume and mix, detects anomalies, writes the commentary, and verifies every figure in it against the computed data before publishing.
- Deterministic code does the arithmetic and the model only writes prose, making verification a matching problem; measured by error injection at **98%** detection across **41** planted errors with **0** false positives, enforced in CI.

Global Superstore Profitability

Tableau · Live on Tableau Public

- Published an interactive dashboard with a world profit map over **20,000** orders across **21** countries, surfacing **10** loss-making markets and Tables as the biggest profit drain.

Sales & Revenue Executive Dashboard

Power BI, DAX, Power Query

- Built an executive dashboard on a star-schema model over **60,000** sales rows with time intelligence, targets vs actuals, and drill-down by product, region, and rep (**\$73.3M** revenue, **36.2%** margin, **+12.9%** YoY).

Customer Churn Analysis & Prediction

Python, scikit-learn

- Analyzed **7,500** customers (month-to-month churn **51.8%** vs **7.9%**) and built a logistic-regression model with **0.798 ROC-AUC** that recalls **75%** of churners.

SQL Analytics Portfolio

SQL (SQLite)

- Wrote 7 analytical queries on a **70,000+**-row retail database using joins, window functions, CTEs, and cohort logic; found Electronics drives **45.4%** of revenue.

Nine projects with code and write-ups at keneven.github.io

CERTIFICATIONS & ADDITIONAL

Certifications: Google Data Analytics Professional Certificate (in progress) · Extern Completer, Breaking Games Externship (May 2026)

Volunteering: Trent Walkhome · Habitat for Humanity
